

Growing inspiration in your garden...

## PRESS RELEASE

### Sungold's six new sisters launched by Mr Fothergill's (MRF563)

Tomato **Sungold F1** is regarded by many as the finest flavoured, and now the renowned 'cherry' type has been joined by six brand new varieties in Mr Fothergill's range from the same breeding programme, three of which are exclusive to the Suffolk seedsman. All performed remarkably well in the company's huge 2015 tomato trial, and are said to have a flavour as outstanding as that of their illustrious 'sister'.

**Suncherry Smile F1**, **Sunchocola F1** and **Sunlemon F1** are available only from Mr Fothergill's for the 2016 season. Red-fruited **Suncherry Smile F1** produces masses of very sweet tomatoes, while **Sunchocola F1** has attractive brick red to brown fruits, which are incredibly tasty eaten straight from the plant while still warm. **Sunlemon F1** is the earliest of the group to mature, producing plenty of lemon-yellow little fruits. All three are available from garden centres, other retailers, the company's mail order catalogue and online at [www.mr-fothergills.co.uk](http://www.mr-fothergills.co.uk)

Tomato **Suncherry Premium F1**'s sweet fruits are produced for many weeks, **Sungreen F1** yields lime-green fruits with a sweetness which belies their appearance, and **Sunpeach F1** yields warm pink-red little tomatoes. These three are available from the catalogue and website.

All six display excellent disease resistance, ensuring the plants remain robust all summer long. They are indeterminate, so require staking and the removal of sideshoots, and can be grown either in a greenhouse or outdoors. A packet of 10 seeds of any of the six new varieties costs £3.25.

**Ends**
