

Vitax Sterilised Bonemeal is an organic fertiliser which provides both phosphate and nitrogen, two elements essential for healthy plant growth.

This slow, steady release of nutrients over a long period make Bonemeal an ideal fertiliser for bulbs and herbaceous plants, shrubs, roses, fruit trees and strawberries.

DIRECTIONS FOR USE

PRIOR TO SOWING OR PLANTING: apply 140 grammes per square metre (4oz per square yard).

ESTABLISHED ROSES, SHRUBS AND BORDER PLANTS: apply as a top dressing in the Spring at 140 grammes per square metre (4oz per square yard).

FRUIT TREES AND BUSHES: apply as a top dressing in the Autumn at 140 grammes per square metre (4oz per square yard).

HELPFUL ADVICE

Read the directions carefully before use.

Store the fertiliser in a dry place away from children, pets and foodstuffs.

Product may irritate cut or broken skin. Wash hands after use.

Do not exceed the recommended application rates.

Avoid fertiliser lodging on leaves and stems.

Do not use where cattle, sheep, goats and deer have access.
