MEDO

Ready to use pruning
compound and grafting
sealant

200g e

Medo protects open wounds caused by pruning, accidental damage or grafting from invading fungal and bacterial parasites. The product forms an elastic waterproof skin with protectant and scar healing properties.

DIRECTIONS FOR USE

For Pruning:

Apply Medo to all open wounds, pruning or saw cuts on fruit and ornamental trees. Remove any loose hanging bark. Work the Medo into the wound by thorough brushing to produce a 2-3mm layer. For deep fissured bark repeat the treatment when dry.

For Grafting:

When grafting or budding trees, roses or shrubs, securely bond the graft or scion to the stock, then apply Medo all around the graft to form an elastic waterproof seal.

NOTE:

Wash brushes immediately after use in warm soapy water. Do not use product when temperatures are below 0°C. Apply to a dry surface. Product is rainfast when dry. Store in a cool place. Protect from frost.

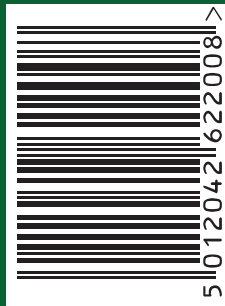

PRECAUTIONS

KEEP OUT OF REACH OF CHILDREN
KEEP CONTAINER TIGHTLY CLOSED, IN A COOL,
WELL VENTILATED PLACE.
